

Tempmate.® GS2 T / TH / TE

Temperature / Humidity datalogger with 4G transmission

Temperature & humidity datalogger with 4G transmission for real time monitoring

The Tempmate GS2 is a single-use temperature & humidity data logger. It incorporates a 4G communication module and the corresponding subscription. It transmits in real time the measurements taken and its location.

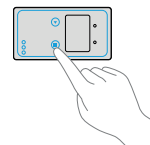

All measurements are displayed immediately in the free cloud software.

The Tempmate GS2 is the ideal device to monitor the transport of your fragile goods and to be alerted immediately in case of problems.

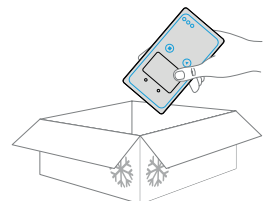

ITS STRENGTHS

- + Temperature, Humidity, External sensor, Light
- + Real time global tracking
- + 4G transmission, worldwide subscription included
- + Autonomous for 60 days
- + Localization
- + Free cloud access
- + Battery choice: Lithium or Non-lithium models

01 Preconfigured and ready to use

02 Adding the Tempmate GS2 to the shipment

03 Real-time monitoring in the cloud

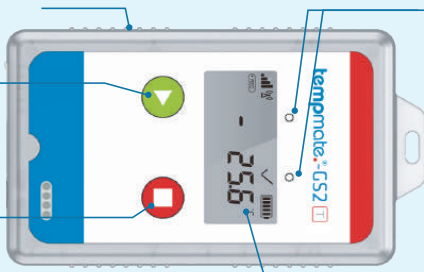

04 Check final Reports with all Details
